PROFILE

I take software from an ambiguous requirement to a maintainable release—working across interfaces, services, data, and emerging technology when the product calls for it. Open to thoughtful teams, technical collaborations, and product work with real ownership.

EXPERIENCE

Full-stack Developer

Jul 2024 – Present

Zinza Technology · Full-time

Develop and maintain web applications with Node.js and Next.js.

Design PostgreSQL and MongoDB data models and improve retrieval paths.

Integrate smart contracts and manage application-level on-chain interactions.

Evaluate AI models, design prompts, and contribute feedback loops that improve output quality.

Unity 2D Developer

Jan 2024 – Mar 2024

HN Technology · Part-time

Built 2D game features with Unity and C#.

Translated design concepts into responsive gameplay systems and iterated with the team.

Software Developer

May 2021 – Jun 2023

SellAccount · Part-time

Built automation solutions spanning Android and web workflows.

Researched Android platform behavior to improve automation reliability and maintainability.

Maintained internal web applications and supported production operations and customers.

TECHNICAL SKILLS

Languages

TypeScript, JavaScript, Python, Rust, Solidity, C#

Web

Next.js, React, Svelte, Node.js, NestJS

Data & platform

PostgreSQL, MongoDB, Docker, Git, Android

Domain

Web3, smart contracts, AI model evaluation, Unity 2D

EDUCATION

Academy of Cryptography Techniques

Engineer’s degree · Information Technology

2019 – 2024

SELECTED SCOPE

Production web systems

Application engineering

Blockchain delivery

Product integration

Workflow automation

Internal tooling
